International Conference on Live Coding 2023 - Submission Templates

In this package, you can find the submission templates for:

- Papers
- Live Performances
- Community Reports
- Workshops
- Video Gallery Submissions

Papers

The templates for papers are available in two formats, in *Markdown* (also known as *Commonmark*) format, and Microsoft Word.

Independent of which format you choose, please make sure you submit your contribution as a PDF file !

The short biographies of the contributors (max. 150 words) can be attached as an informal PDF in the submission system. Please **don't** include it in the paper itself !

Markdown / Commonmark

With the Markdown template, you write your paper as a text file, with simple markup to specify formatting, citations and the inclusion of images. This file (README.md) is itself formatted in the *Markdown* format. For more information please refer to the template itself, which is *papers/markdown/iclc2023.md*. The template contains a tutorial on how to convert the Markdown file to PDF.

You need **Pandoc** and a LaTeX distribution installed to create the PDF.

Microsoft Word Template

This template comes in the form of an MS Word document, where you replace the example text with that of your paper. The template is in papers/doc/iclc2023.doc.

Editing the template with LibreOffice shouldn't be problematic either.

Live Performances

For live performances, please fill out the submission template and the technical questionnaire, and send them through the submission system as a PDF file !

Again, you can find templates in MS Word and Markdown formats. To convert the Markdown file to a PDF file using **Pandoc**, type:

```
pandoc proposal_live_performances.md -o proposal_live_performances.pdf
```

Community Reports

If you are submitting you community report as a video, template in the *community_reports* folder.

If your submission is in text format, please use the paper template above !

Again, you can find templates in MS Word and Markdown formats. To convert the Markdown file to a PDF file using **Pandoc**, type:

```
pandoc community_report_video.md -o community_report_video.pdf
```

Workshops

For workshops, please fill out the proposal template and the technical questionnaire in the *workshops* folder, and send them through the submission system as a PDF file !

Again, you can find templates in MS Word and Markdown formats. To convert the Markdown file to a PDF file using **Pandoc**, type:

```
pandoc proposal_workshops.md -o proposal_workshops.pdf
```

Video Gallery

For workshops, please fill out the proposal template and the technical questionnaire in the *video_gallery* folder, and send them through the submission system as a PDF file !

Again, you can find templates in MS Word and Markdown formats. To convert the Markdown file to a PDF file using **Pandoc**, type:

```
pandoc proposal_workshops.md -o proposal_workshops.pdf
```
